AMAZING WHALES!

Help this humpback whale calf
find his mother

IT'S WHALE SEASON!!

DID YOU KNOW

Having a whale of a time

Did you know that whales
are mammals?

In fact whales are the largest living
animals in the world!

There are 79 to 84 different species of
whale. They came in many different
shapes and sizes!

The groups that whales travel in are
known as pods.

Whales love to sing! They use a call to
mates, a way to communicate and also
just for fun! After a period of time they
get bored of the same whale song and
begin to sing a different tune.

You can tell the age of a whale by
looking at the wax plug in it's ear!
